Hot air styler VT-1342

Instruction manual

Description

- Body
- Air inlet grid
- Air supply speed switch (0/1/2)
- "Cool" air supply on/off button *
- Attachments clamp "push"
- Power indicator
- Brush with bristles 19 mm long
- Thermo-brush 33 mm
- Thermo-brush with removable teeth 30 mm
- Brush attachment tip
- Flat brush
- Concentrator
- Bag for storing

ATTENTION!

- For additional protection you can install a residual current device with nominal current of operation, not exceeding 30 mA into the mains of the bath-room; while installation, refer to a specialist.
- Keep the unit near objects filled with water (sink, bath, swimming pool etc.).
- When using the hair dryer in a bathroom, disconnect it immediately after usage, pull the plug out of the socket, because when water is in close proximity it constitutes danger even when the unit switch is in off position;

For additional protection you can install a residual current device with nominal current of operation, not exceeding 30 mA into the mains of the bath-room; while installation, refer to a specialist.

SAFETY MEASURES

Read these instructions carefully before using the unit. Keep this manual during the whole operation period.

To protect against risk of electric shock:

- Before switching on the unit, make sure that the voltage of the electric network corresponds to the operating voltage of the unit.
- Use only the details or the attachments, supplied with the unit.
- Never leave the operating unit unattended.
- Do not switch on the unit in places where aerosols or inflammable liquids are used.
- Always unplug the unit immediately after using and before cleaning.
- Do not use the hairdryer while bathing.
- When unplugging, do not pull the cord, take the plug.
- Do not touch the cable plug with wet hands.
- Do not keep the unit in places where it can fall into a bath or a basin, filled with water; do not immerse the unit into liquid or other liquids.
- When using the unit in a bathroom, unplug the unit after usage, as switches of water is dangerous, even if the unit is switched off.
- If the unit falls into water, unplug it immediately. And only then you can take it out of the water.
- Close supervision is necessary when children or disabled persons use the unit.
- This unit is not intended for usage by children or disabled persons unless they are given all the necessary instructions on safety measures and information about danger, which can be caused by improper usage of the unit.
- Do not use the device if you feel drowsy.
- Take the operating unit only in the zone of the handle.
- Do not use the unit to straighten wet hair or synthetic wigs.
- Do not direct hot air into your eyes or other parts of your body, which are sensitive to heat.
- Avoid contact the hot surfaces with your face, neck and other parts of your body.
- The attachment gets hot during use. Let it cool down before removal.
- Never drop or insert any object into any openings of the unit housing.
- Never block the air openings of the appliance or place it on a soft surface, such as a bed or sofa, where the air openings may be blocked. Keep the air openings free of lint, dust and hair etc.
- Avoid hair getting into air inlet grid during operation of the unit.

Styling from the upper side of the head. Remember that hair should be dried from roots before starting to dry the next lock make sure that you have dried the previous lock from roots to tips.

Protection from overheating

This hair-dryer has protection from overheating which will switch off the hair-dryer if the outlet air is hot. If the hair-dryer stops working switch it off by the switch (3) setting it to the "0" position, unplug the hair-dryer, provide that the inlets and outlets are unblocked and let the hair-dryer cool off for 10-15 minutes. After it you can switch it on. Do not block the air openings during air operation of the unit and avoid getting of hair into the air inlet opening (2).

Clean and care

- Set the switch (3) to the "0" position and disconnect the hair dryer.
- The housing of the hair-dryer can be cleaned with a wet cloth.
- After that, it is necessary to dry the housing.
- Never immerse the unit into water or other liquids.
- Do not use abrasives and solvents to clean the unit.
- Storage**
- Always unplug the unit if it is not being used
- Never wind the cord around the hairdryer. It can cause damage to the hair-dryer. Periodically strengthen the cord if it is overturned.
- You can store the unit and the attachments in the bag (13).
- Keep the unit in a dry cool place out of reach of children.
- Never use the unit if the power cord, the plug is damaged; if the unit malfunctions or after it fell into water. Apply to the authorized service centre for repair.
- Before you take the unit away, let it cool down, do not wind the power cord around the unit.
